These stately flowers, symbols of purity and devotion, whose regal grace and glistening whiteness give a supreme distinction to any garden, are especially alluring against a background of blue Delphiniums.

Our bulbs are selected from the choicest collection in France and produce stalks 4 to 5 feet tall, often with 10 to 15 magnificent blooms on a single stem.

To secure their gracious beauty for your garden next year at these unusually low import prices, the bulbs must be ordered now. They will be delivered to you ready for planting next September.

BOTANICAL TULIPS (Species) for the Rock Garden

A most interesting group of wild Tulip species native of the mountain slopes and valleys of Central Asia and Asia Minor—lovely odd shapes, many with reflexed petals and curiously twisted, spotted, and reflexed foliage. They simply belong to the rock garden where their individual beauty stands out most prominently. Here they thrive and increase if left in the ground year in and year out. Plant them in groups of six to twelve among the rock in fairly deep, well-drained pockets.
